The workshops cover various types of radios and antennas, and help Attendees perform a "Two-way Radio Needs Assessment" (attached) to help us make recommendations on the equipment that best suits their specific needs.

We also cover and demonstrate how weekly Radio "Safety Nets" help Residents become familiar with using radios, and gain confidence by practicing radio communications skills.

I've also attached some examples of printed materials we've developed to help residents get a GMRS radio license and understand how Neighborhood Radio Watch programs work.

We've posted additional Neighborhood Radio Watch support materials on our web site at http://www.EDCARC.net.

---

The General Mobile Radio Service (GMRS) supports cheap but effective radio communications without testing requirements. The license covers your entire family; spouse, children, grandchildren, parents, grandparents, brothers, sisters, aunts and uncles, whether living with you or not.

Neighborhood Radio Watch

Neighborhood Radio Safety Nets help your Community to stay in touch and practice radio communications before a disaster strikes!

“Safety Nets”

Neighborhood Radio Watch Programs are not a replacement for cell phones or Emergency Services. They offer a backup solution that enables you to communicate when all else fails.
